

CAPTURE AND MANAGE YOUR BUSINESS

Efficient and Versatile Content Management

Cloud Portal Office (CPO) is an award-winning document management and collaboration service. Accessible from virtually any device including computers, mobile phones, tablets, Sharp AQUOS BOARD™ interactive display systems and Sharp OSA®-enabled MFPs, Cloud Portal Office helps maximize workplace efficiency. Affordable, scalable and easy-to-use, CPO gives small - to medium-sized businesses a versatile document management solution that integrates into your business process to help improve efficiency, reduce costs and drive growth.

CAPTURE and store documents!

Scan and archive hardcopy documents directly from your Sharp OSA-enabled MFP to the same location as your digital files. With Indexing from the desktop or the MFP, easily retrieve any of those documents later, either in the office or on the go. You can even print PDFs and image files directly from the MFP.

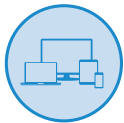

CONTROL your business content!

Cloud Portal Office provides more granular control of stored content with enhanced folder sharing. You can set permissions by user or group to share as much or as little as you like. Built for business, IT Administrators can control access, manage users, reset passwords and more. The CPO Mobile app is also compatible with MobileIron's enterprise mobility management platform which provides remote wipe capabilities through its "Retire Device"* feature.

CONFERENCE with confidence!

Be a star in the conference room. No laptop required! Simply sign in and quickly access your meeting materials on your AQUOS BOARD display. Generate temporary guest credentials so meeting attendees can share their materials. And when you're done, your content leaves with you.

CONNECT from virtually anywhere!

Access your business documents whether you are at the office, at home, at the airport, etc. from your computer, tablet or smart phone. "On-the-go" access to your stuff allows you to stay connected so you can continue to work uninterrupted. Simply said, it helps maximize the productivity of an increasingly mobile workforce.

COLLABORATE seamlessly!

Whether working together on a common goal or simply sharing information, CPO improves project collaboration and teamwork. Quickly share folders with individual CPO users or share files by emailing a link to anyone around the world.

Key Benefits of Cloud Portal Office:

- Flexible content management
- Tighter control over who can access, edit and share your files
- Reduced storage costs
- "On-the-go" access to stored content
- Quickly share meeting materials at the AQUOS BOARD display

* "Retire Device" feature is available directly through MobileIron, a third party solution provider. Any reference in this document to MobileIron and its services is for informational purposes only. Sharp does not make any warranty regarding MobileIron's products or services. To enable the MobileIron "Retire Device" service, your company must be a MobileIron customer and the CPO app must have been deployed to the user as a MobileIron managed app. When a mobile device is compromised or an end user separates from the company, a "Retire Device" event is sent to the mobile device by the MobileIron administrator. For more details and subscription information please contact Kate Dietrich at MobileIron at Phone: 650-605-7044, Email: kdietrich@mobileiron.com.

Cloud Portal Office includes a suite of software:

Cloud Portal Office

Refers to the service as a whole as well as a Web browser, accessible from virtually any device that connects to the Internet.

Cloud Portal Office Desktop

Desktop indexing station with sync capability for Macintosh® OS and Microsoft® Windows® operating systems.

Cloud Portal Office Scan/Print

Sharp OSA-enabled MFP Connector.
