Important Information

• This software has been shipped after strict quality control and product inspection. If, however, you find any failure or malfunction, contact your product dealer.
• Please understand that SHARP CORPORATION bears no responsibility for errors made during use by the customer or a third party, nor for any other malfunctions or damage to this software arising during use, except where indemnity liability is recognized under law.
• Transcribing or duplicating part or all of this manual and/or this software without permission from our company is not permitted.
• As a part of our policy of continuous improvement, SHARP reserves the right to make design and specification changes for product improvement without prior notice.
• The contents or details may vary depending on the screen configuration and OS version, etc.
• This manual does not contain basic operating instructions for Windows.

Trademarks

• Microsoft and Windows are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
• Intel, Celeron, and Intel Core 2 Duo are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the U.S.A. and other countries.
• AMD, AMD Sempron, AMD Athlon, and combinations thereof are trademarks of Advanced Micro Devices, Inc.
• All other brand and product names are trademarks or registered trademarks of their respective holders.
Introduction

This software can be used to configure settings for touch action when using a touch pen or touch action on a computer connected to the video input terminal of an applicable model.

To use a touch pen or touch action with a computer connected to applicable model, this software must be installed on the computer.

The touch pen (Pointer pen) that is included with an applicable model is referred to as “active pen” in this manual.

System Requirements

<table>
<thead>
<tr>
<th>OS</th>
<th>Windows 7 (32-bit or 64-bit version), Windows 8.1 (32-bit or 64-bit version), Windows 10 (32-bit or 64-bit version)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>Intel Celeron or AMD Sempron 1.6 GHz or faster, Intel Core 2 Duo or AMD Athlon II X2 2.8 GHz or faster recommended</td>
</tr>
<tr>
<td>Memory</td>
<td>At least 2 GB</td>
</tr>
<tr>
<td>Free space on hard drive</td>
<td>At least 100 MB</td>
</tr>
<tr>
<td>USB port</td>
<td>USB (2.0 compliant)</td>
</tr>
</tbody>
</table>

**TIPS**

- Depending on the application software, active pen operation may not be possible (for example, if the application processes mouse and other operations independently).
Setting up the computer

Install

**Caution**
- Insert the touch pen adapter into the LCD monitor before installing this software.
- If an older version of this software is installed, remove (uninstall) the old version before installing this software. (See page 13.)
- This can only be done by a user with administrator authority.

1. Start your computer.
2. Exit all applications that are running.
3. Connect the USB cable.
   After it has been connected, the touch panel will be automatically recognized.

![USB port diagram]

4. Insert the supplied CD-ROM into the CD-ROM drive of the computer.
5. Double-click the setup program.

   ¥TouchpenManagementTool¥Setup.exe

6. For the remainder of the procedure, follow the instructions shown on the screen.
   - When the “User Account Control” screen appears, click “Yes” (or “Allow”).
   - If the “Windows Security” screen appears, click “Install” (or “Install this driver software anyway”).
   - If the “Software Installation” screen appears, click “Continue Anyway”.

This completes the installation of this software.

Each time the computer is started, this software will start automatically to enable the active pen to be used.

**TIPS**
- When this software is launched, an icon appears on the taskbar.
  The icons that appear on the taskbar vary depending on the status of the touch panel and pen adapter.

<table>
<thead>
<tr>

* The USB port varies depending on the terminal connected to the computer.

DisplayPort 1 input terminal/HDMI 1 input terminal  USB 1 port (for touch panel)
D-sub input terminal/DisplayPort 2 input terminal/HDMI 2 input terminal/HDMI 3 input terminal  USB 2 port (for touch panel)

(Factory setting. Can be changed in TOUCH INPUT SELECT in the SETUP menu.)
This software starts automatically.
You can view information on the operation mode being set and active pen being used.

1. Click the Touch pen Management Tool icon ( ) on the taskbar.

<table>
<thead>
<tr>

<td>Exit this software.</td>
</tr>
</tbody>
</table>

**TIPS**

- If an active pen is not used for 1 minute, it will enter sleep mode. When the active pen is used, it will automatically wake.
- When an active pen is in sleep mode, the battery level and signal strength will not be shown correctly. After the pen wakes, it will take time for the battery level and signal strength to be shown correctly.
- When an active pen is in sleep mode, the active pen settings cannot be configured.
- Do not continuously press the tip or function button of an active pen. It may not be possible to configure the active pen settings.
Touch panel settings

1. Click the Touch pen Management Tool icon (✓) on the taskbar.
2. Click the place on the touch panel settings that shows the operation mode.

3. Click each menu and change the settings.

**Touch Operation Mode Setting**

Select operation mode of the touch panel.

- **Standard Touch Mode**: The touch action takes place when the screen is touched by active pen or finger.
- **Pen dedicated Mode**: The touch action takes place only when the screen is touched by active pen. The touch action does not take place when the screen is touched by finger.
- **Pen digitizer Mode**: You can use an active pen as a digitizer pen in Windows. Applications that support a Windows digitizer pen distinguish between finger touch and active pen touch, and respond with different actions. For details, check the application’s manual.

**TIPS**

- Set to “Standard Touch Mode” to use Simultaneous Drawing or Eraser in the Pen Software.

**Others**

**Recognize eraser**

Select this checkbox to use the eraser.
Change the active pen settings

1. Click the Touch pen Management Tool icon ( ) on the taskbar.
2. Click the active pen that you want to set in the touch pen list of the touch pen settings screen.
3. Click the tab of the item you want to set and change the settings.

**Basic**

**Showing information**  
Shows the firmware version and ID of the selected active pen.

**LED Setting**  
Set how the active pen LED lights during use.  
- Always Light On: Always lights.  
- Blink slowly: Blinks.  
- Light On when button is pressed: Lights while the function button is pressed.

**Unregister**  
Release the registration (pairing) of the selected active pen.
**Pen**

**Input pen pressure**  
Shows the current amount of pen pressure.

**Start value of pen pressure detection**  
Set how hard the active pen must be pressed to be recognized.

**Saturation value (100%) of pen pressure**  
Set the amount of active pen pressure that is treated as the maximum pressure.

**Automatic setting**  
Normally not used.  
If pen pressure is detected when the pen tip is not being pressed, the pen pressure will be automatically adjusted.  
Do not press the pen tip during automatic setting.

**Default**  
Return the “Start value of pen pressure detection” and “Saturation value (100%) of pen pressure” to the factory default settings.
Function buttons

Functions can be assigned to the function buttons 1 to 3 of an active pen. You can also specify whether or not the pointer function is assigned to function button 4. After selecting a function button, select the function to be assigned to the button.

<table>
<thead>
<tr>
<th>Function type</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows</td>
<td>Disable, Right mouse click, Undo, Redo, PageUp, PageDown, ↑ (cursor up), ↓ (cursor down), Eraser*1</td>
</tr>
<tr>
<td>Pen Software</td>
<td>Pen Software Link*2</td>
</tr>
</tbody>
</table>

*1 Can be used when the operation mode is “Pen digitizer Mode”. (See page 6.) Can be used as the eraser for the digitizer pen in Windows.
*2 Cannot be used when the operation mode is “Pen digitizer Mode”.

To return the function buttons to the settings below, click “Default”.
- Function button 1: Pen Software Link
- Function button 2: PageDown
- Function button 3: PageUp
- Function button 4: Pointer
Para a função Pointer:

**Image Preview**
- Mostra o ícone de ponteiro atualmente configurado.

**Shape**
- Define a forma do ponteiro.

**Size**
- Define o tamanho do ponteiro.

**Color**
- Define o cor do ponteiro.

**Transparency**
- Define a transparência do ponteiro.

**Disable left click**
- Selecionar esta opção para desabilitar o clique com o botão de mouse 4.

**Disable tilt**
- Selecionar esta opção para desativar a detecção de inclinação do caneta.

**Invert pen direction**
- Selecionar esta opção para usar a função de ponteiro com o pincel apontado para o invés do ponteiro.

**Show pen number in image**
- Selecionar esta opção para mostrar o número do caneta no ícone de ponteiro.

**Advanced**
- **Pointer speed**: Ajuste a velocidade com que o ponteiro se move quando a caneta ativa estiver em movimento.
- **Image stabilization**: Ajuste a movimentação do ponteiro devido à desfocagem.
- **Pointer start time**: Defina o tempo até que o ponteiro apareça após o botão de função ser pressionado.
- **Centering Time**: Defina o tempo até que a posição do ponteiro retorna ao centro da tela.
  - O ponteiro retornará ao centro da tela quando o tempo for atingido após parar de usar a função de ponteiro.

**Default**
- Retorne todos os itens nas configurações de ponteiro para seus valores padrão.

**TIPS**
- Para executar um clique, pressione o botão de função 4.
- Para usar como ponteiro, pressione e segure o botão de função 4.
- Para arrastar, pressione e solte o botão de função 4 e imediatamente pressione e segure o botão de função 4. O ponteiro se moverá para a posição onde você soltar o botão de função 4.
- Se os ícones de ponteiro se sobrepuserem quando várias canetas forem usadas, o ícone com o número mais baixo será exibido.
- Enquanto estiver fazendo clique ou arrastando, não é possível usar clique ou arrastar em outra caneta ativa.
Changing the shape or color of the pointer icon

You can change the pointer icon settings while using the pointer function (while pressing function button 4).

Only one active pen can be set at once.

1. To change the icon shape: Press function button 2 while pressing function button 4.
   To change the icon color: Press function button 3 while pressing function button 4.

   The selection changes each time you press function button 2 or 3.

2. When you have completed the settings, release function button 4.

Spotlight

When spotlight (Spotlight) is selected in “Shape”, the overall screen darkens and a bright circular area appears at the pointer position.

TIPS

- The size and transmittance (brightness) of the spotlight is determined by the “Pointer”.
- When the spotlight is set, the pointer cannot be used with other active pens.
- When using the spotlight, you can perform touch or mouse actions on the brightened part of the screen only.
Registering(pairing)/unregistering an active pen

Up to 4 active pens can be used simultaneously.
To use the optional active pen, you must register the active pen (pairing).
Up to 8 active pens can be registered.
You can also cancel the registration of an active pen.

Registering an active pen

Perform active pen pairing for one pen at a time.
1. Click the Touch pen Management Tool icon ( ) on the taskbar.
2. Click “Touch pen registration” in the “Touch pen settings”.
3. Click “Registration” in the touch pen settings screen.
4. Simultaneously hold down function button 1 and function button 3 of the active pen being paired for at least 5 seconds.
5. When the LED blinks twice or more, release function button 1 and function button 3.
   A message appears after completion of pairing.
6. Click “OK”.

Unregistering an active pen

1. Click the active pen you want to cancel in the touch pen list on the touch pen settings screen.
2. Click “Unregister”.

Perform active pen pairing for one pen at a time.
Uninstall

Caution

• This can only be done by a user with administrator authority.

1. Click the Touch pen Management Tool icon ( ) on the taskbar and click “Exit”.
   • If a confirmation window appears, click “Yes”.
2. Select “Control Panel” from the “Start” menu.
3. Click “Uninstall a program”.
   • If you are using icon view, click “Programs and Features”.
4. Select “SHARP Touch pen Management Tool” and click “Uninstall”.
   • Follow the on-screen instructions.
   • When the “User Account Control” screen appears, click “Yes” (or “Allow”).
5. If a screen appears prompting you to restart your computer, restart your computer.

This completes the uninstallation.
